

CSCI 497P: Computer Vision

Scott Wehrwein

Lecture 0: Introduction, Logistics

Zoom lectures will be recorded and posted for viewing only by members of this class. By joining the live lectures you consent to being a part of this recording. To avoid appearing in lecture recordings, you may take any of the following actions:

- Disable your video
- Mute your microphone; you may still ask questions via chat.
- Do not join the zoom calls and watch the videos asynchronously.

About Me

Scott Wehrwein

My research interests

- Research interests:
 - **Computer vision** and graphics
 - Computational photography and videography
 - Photo and video enhancement
 - Visualization

The short-term plan

Today:

1. What is computer vision?
2. Course logistics

Tomorrow:

1. Course overview: What will we cover?
2. Jumping in: images, filtering and convolution

Questions?

- Using the "Raise Hand" feature:
 - At the bottom of Zoom, click "Participants"
 - At the bottom of the pane on the right side, click "Raise hand"
 - Hold spacebar to temporarily unmute your mic ("push to talk")
- Using Chat:
 - At the bottom of Zoom, click "Chat" and enter your question.

What is computer vision?

- A goal-oriented field.

Tesla Autopilot
Safety features in many newer cars

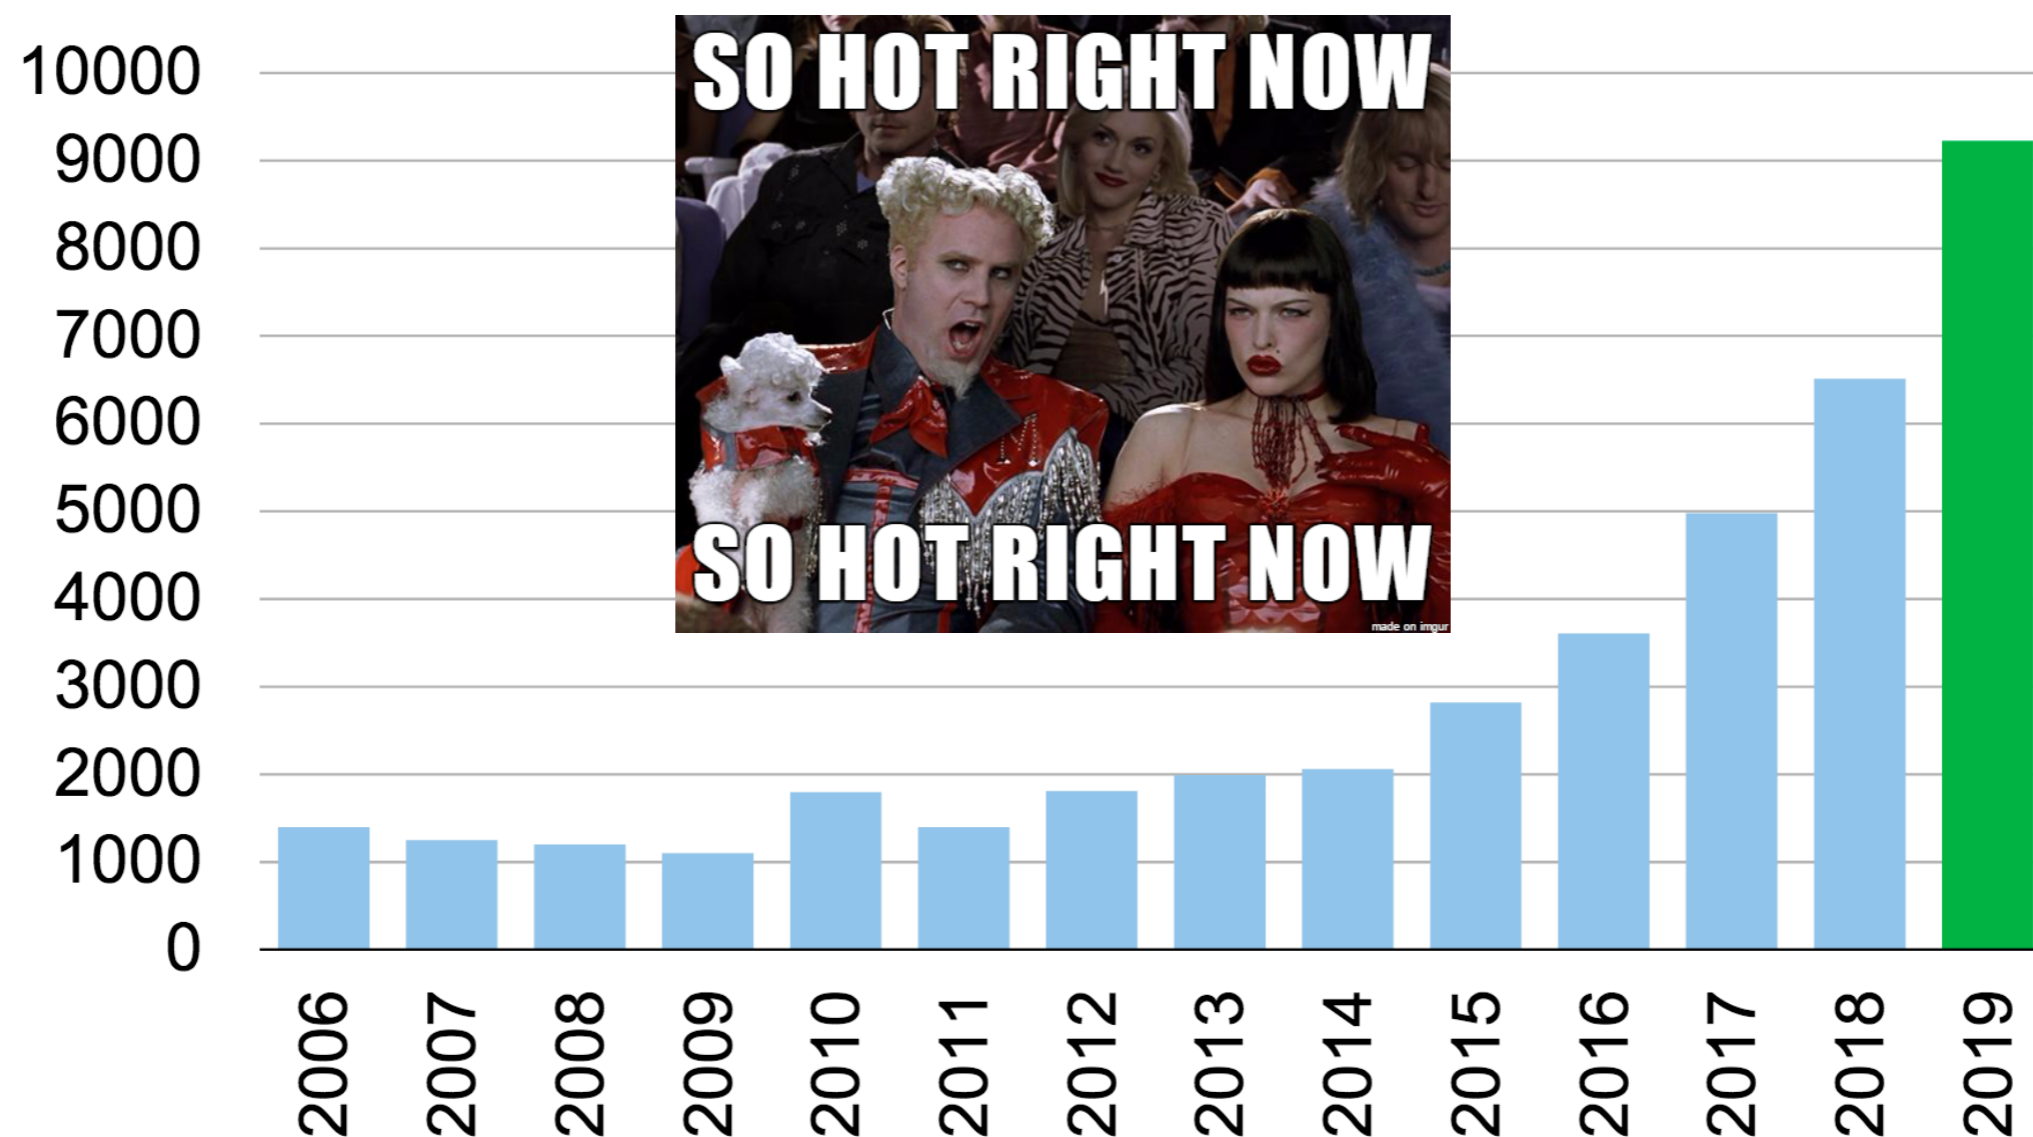

Waymo
Uber
...

And so on...

- You just saw some examples of recent systems, many new in the past few years.
- Computer vision is a highly active research area
 - Deep learning has revolutionized the field in the past decade
- Lots of work going on in industry, both at Big Tech and startups.

Computer Vision

Attendees at CVPR, the flagship computer vision research conference:

Questions?

- Using the "Raise Hand" feature:
 - At the bottom of Zoom, click "Participants"
 - At the bottom of the pane on the right side, click "Raise hand"
 - Hold spacebar to temporarily unmute your mic ("push to talk")
- Using Chat:
 - At the bottom of Zoom, click "Chat" and enter your question.

What to expect from this course

- We will not (cannot) cover everything you just saw.
- There will be more **math** than the shiny pictures let on. We will use lots of Linear algebra and some calculus.
 - I'll try to give reminders/primers as we go.
 - I don't always know what you don't know - please **tell me** if I'm using stuff you haven't seen.
- Whiteboard-style presentation coming soon - my new iPad arrives later this week.

Course Logistics

- Course website is the syllabus:

https://facultyweb.cs.wvu.edu/~wehrwes/courses/csci497p_20s/

- Remote logistics:
 - Lecture: Synchronous Zoom lectures plus recordings.
 - In-class exercises: break-out groups and Socrative polls
 - Office hours: Zoom meeting with waiting room

Course Logistics

- Course website is the syllabus:

https://facultyweb.cs.wwu.edu/~wehrwes/courses/csci497p_20s/

- Assessment:
 - Programming projects (50%)
 - Written homeworks (15%)
 - Take-home midterm (15%)
 - Take-home final (20%)

Policies

- Late work: 3 free slip days; after that, get in touch ahead of time and I'm often flexible.
- I want your feedback - email, office hours, or via anonymous Google Form linked from the syllabus.
- Inclusive classroom
